Evans Armantrading III

302-730-7344 | evansarm3@gmail.com | linkedin.com/in/evansiii | github.com/3vqns | Dover, DE

Education

Delaware State University Dover, DE

Bachelor of Science in Computer Science, GPA: 3.92 *Aug 2023 - May 2027*

- Dean's List: Fall 2023, Spring 2024, Fall 2024, Spring 2025
- Recognitions/Certifications: Google Cybersecurity Certification (Coursera), 1890 Scholar, Speaker at 2025 Mid Atlantic Chapter of the American Fisheries Society Conference, 2x Hackathon Winner, FICO Challenge Winner

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, HTML, CSS, C++, SQL
Tools: FastAPI, Next.js, React, Tailwind CSS, Google Gemini API, PyTorch, YOLO, Git, Tabsyn, scikit-learn
Cloud/Databases: PostgreSQL, Supabase, REST API
Operating Systems: MacOS, Windows, Linux

Experience

Data Science Intern June 2026 - Aug 2026

FICO *San Diego, California*

- Ran 8 EDA audits, created modeling reports with supervised and unsupervised models, and collaborated in a 3 person team to make our own network-intrusion dataset.
- Built a unified network-intrusion dataset of 2.4M traffic flows spanning three public packet captures, by re-extracting ˜70GB of raw PCAP data under one NFStream schema.
- Used Tabsyn for synthetic generation for our new dataset to create a more diverse and robust dataset.
- Used a combination of methods like profiling and attack camouflage to raise detection AUC from 0.909 to 0.968 on the final dataset version.

Research Intern July 2024 - Present

CIBiLI (Computational Intelligence in Biological and Legal Informatics) *Dover, DE*

- Built an AI image detection pipeline using YOLOv8 (93% accuracy) to identify fish breaching from rivers.
- Collaborated with researchers to deploy a real-time detection system to assist ecological conservation efforts.
- Presented project at Mid Atlantic Chapter of Atlantic Fisheries Society and won first place at the conference.

Founder & CEO Jan 2024 - Present

Evans Estates LLC *Dover, DE*

- Founded a real estate investment and renovation company managing a full-scale property flip end-to-end.
- Coordinated 8 contractors, obtained 4 city permits, and budgeted renovation costs.
- Oversaw redesign of electrical, plumbing, and interior layouts to meet safety and market value standards.

Projects

PictureMe (DSU – Hackathon 1st Place) | *React, Vite, Supabase, AWS Rekognition, Cloudinary* Spring 2026

- Built and deployed a live event photo-matching platform on Vercel that helps attendees instantly find photos they appear in without manually browsing large galleries.
- Implemented QR-based event join flow, per-event role permissions (creator/admin/member), and personalized *My Photos* galleries powered by AWS Rekognition face indexing and search.
- Designed the data model in Supabase and integrated Cloudinary for photo storage/delivery.

Smooth-Cruize (UD – Hackathon 1st Place) | *FastAPI, Next.js, TypeScript, Supabase, YOLOv8* Spring 2026

- Built YOLO-based video processing pipeline (92% accuracy) in Python that detected potholes from dashcam footage, extracted clips, and uploaded detections to our dashboard.
- Implemented backend service integrating Supabase (Postgres, Storage, Auth) and Google Gemini to generate severity scores (1–10) and AI-based damage descriptions.
- Developed a Next.js frontend with Google Maps visualization and dashboard for review and work orders.
- After hackathon, continued working on the project and presented in front of 10 senior members at Delmarva Power.

PoultryGuard | *React Native, Expo, TensorFlow.js* Fall 2025 – Spring 2026

- Built a flock health monitoring app to connect to real-time IoT sensor data streaming temperature, humidity, CO_2, activity, and ammonia data.
- Trained a multi-label neural network to predict risk levels for Heat Stress, Avian Flu, and Salmonella
